AGILE

For quicker, smarter, more
flexible elevators

thyssenkrupp
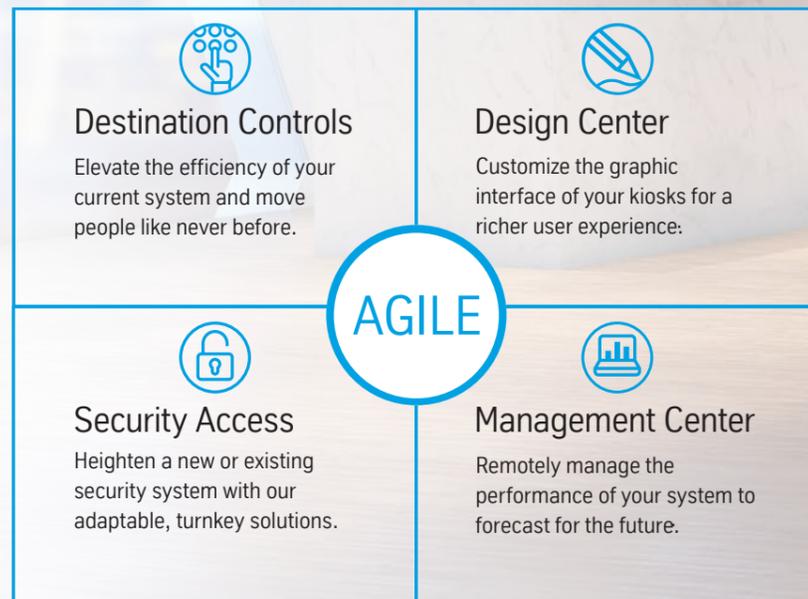

This is
AGILE.

Four intelligent elements to enhance your elevators.

Introducing AGILE — an innovative family of elevator enhancers from thyssenkrupp that's designed to make your elevator system quicker, smarter and more flexible.

With smarter elevator operation, you'll be able to make your building more efficient. With customization, you'll be able to make it yours. With flexible security, you'll be able to better control access. With comprehensive data and reporting, you'll be able to make it a better elevator experience for both passengers and management.

This solution includes four intelligent elements that can improve performance, enhance aesthetics reduce traffic and much more:

Destination Controls

Elevate the efficiency of your current system and move people like never before.

Design Center

Customize the graphic interface of your kiosks for a richer user experience.

AGILE

Security Access

Heighten a new or existing security system with our adaptable, turnkey solutions.

Management Center

Remotely manage the performance of your system to forecast for the future.

Enhance efficiency. Reduce traffic.

AGILE
Destination
Controls

Transporting passengers has never been this intuitive and efficient.

Add this highly-adaptable solution to your new or existing elevator systems and provide tenants with shorter ride times, fewer stops and less congestion.

- Dedicates elevators to specific high-traffic areas as user demand changes

- Moves large tenant populations during peak hours

- Gives tenants private and priority elevator service

- Saves energy during periods of low demand

- Controls elevators independently

- Features customizable, user-friendly kiosks

Up to 30 percent more traffic-handling capacity and 25 percent less elevator travel time than traditional elevator dispatching

Intelligence going up.

Here's the new arrangement. AGILE – Destination Controls intelligently groups passengers who are traveling to similar floor destinations together. Unlike traditional operation, a floor is chosen at the kiosk and the intelligent dispatching software analyzes the request — gauging traffic demand and grouping passengers based on similarity of destination. This leads to less crowding, fewer stops and a more efficient use of available elevator capacity.
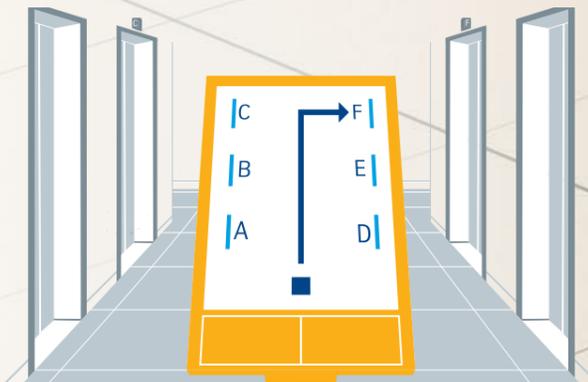

Step 1

Passengers use the kiosk to select their floor. You can add custom button labels and logos to make the process even easier.
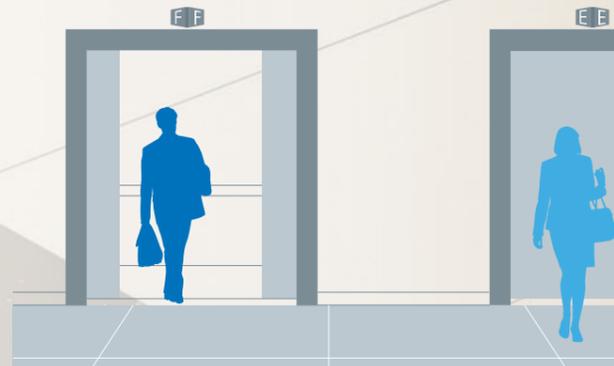

Step 2

AGILE clearly directs each passenger to an assigned elevator.

Step 3

Passengers board the assigned elevator that transports them to their destination fastest.

Organize chaos. Orchestrate movement.
